

I am STILL not supporting any of these options until we put Interstate Drive or another option on the table. These options are a waste of money and do not allow Centennial and Center to be equal. Why does Central still not good enough to have a large enough space and to not have all our facilities so spread out. Why are we not good enough to allow our students to have parking? Are they not equal to Centennial students? Why should our students suffer from the chaos of renovation? Where do those classes go that will be affected in demolition? Where would Art, and Band, and Wood shop, auto shop, science and so on go? In trailers? Seriously? And so when I have students that once again need to make that choice between staying after and getting help with a teacher or catching the bus to the practice field, are you going to explain why they are still having to make that choice? So are you going to have police stationed between areas to monitor our students traveling between areas? Cameras? We have students that watch drug transactions going on around this area, homeless people camped out in the park. How will you make our bell schedule? So not only will you make students go back and forth around the buildings over blocks, but teachers as well? How does that work? PLEASE PUT INTERSTATE DRIVE BACK ON THE OPTIONS. I refuse to support any of these options as they are not equal to the other high school, and they are waste of money to be landlocked still. Oh yeah, and this building has lots of asbestos ask the art teacher that went to remove a bulletin board out of their room to find there was asbestos behind it. So how will the students be safe while that is going on? We don't have the room now and you want us to deal with renovations? Students COME FIRST and you are NOT thinking about students in any of these scenarios. They asked for parking, bigger facilities, and athletics next to school and you did NOT listen to them. So you are building a new school for the students....REALLY?
