

Please would someone consider the possibility of one high school for Champaign. A combined Central/Centennial at the Centennial site.

Site of Centennial high school - together with the Park district probably sits on 80 acres. The Park District land belongs to the citizens of Champaign not to the Park District Board

Demolition of Franklin Middle school and move middle school to present Central site

Centennial neighborhood has lower property values than Central neighborhood. No historic homes would need to be demolished.

The highest rated high schools in the State are over 1000 students. Stevenson High School has divided their large high school into four units with students able to take classes in other units.

We haven't had a State championship in any sport in the division we are in maybe with a combined high school we would have a better chance of winning something.

One each of administrative staff means fewer big salaried personnel

Students would have access to more diverse and enriched classes.

We could have a world class, beautiful high school = shop, trades, arts, science

The high school could use Park district playing fields most of which are used only on Saturdays.

The high school could use the new Leonhard center, the pool, the tennis courts.

A larger better stadium could be built.

Sell the farm land for cash to do this. Pass a referendum that the community could support.
