

I am a former student and i played multiple sports at central. We never had our own fields to practice on nor play our own games on. Yes even though when the football games would be called home games it would still be placed at our cross town rivals field. We always had to share our track and practice with centennial. there is nothing wrong with sharing but we never having the chance to to have our own field. I understand that the reason why central has not moved yet is because people do not want to move central because its in the central of town. thats great and all, but are we really thinking of the kids and the situation they are in right now? Students need the space for athletics and parking. Right now central has no room for both. I remember teachers not having enough room to park, and students always needing to park on the side of the street. To sharing soccer fields, track fields, softball, baseball, football, and many more fields, i think its time for central to really give whats needed to the students and not worry about the location. If some people are really worried about central staying central, then re-name the school. Students come first , thought thats what schools were all about
