

Thank you for taking the time to present this information to the community -- your efforts are greatly appreciated.

As the parent of a Centennial student, I feel it is important to "equalize" the support between the high schools as much as possible. The building is in need of repair, classroom space is limited, hallways are extremely crowded -- and although there is AC, it does not work at all efficiently. I look forward in particular to having improved facilities for theater and arts. I think those needed improvements and the community's support for those areas/activities have sometimes gotten overlooked in the conversation about athletic facilities.
