

Calling this meeting a 'Town Hall' was a misnomer. It more closely resembled an open house. The system of sticker voting was confusing. Even after we asked for a clarification, no general announcement was made. Therefore, many people were asking the same questions of the staff.

My priority is adequate education and safety at Central HS. I am still concerned about construction going on while kids are in school. I am also concerned about the lack of adequate student parking. Since our sports facilities are off site and often must be shared, the burden rests on families to get their kids to and from certain activities (e.g. swimming). As a result, many Central kids drive to school as soon as they have a license. It would be extremely difficult for my daughters to have enough time to eat and finish homework if they had to take an MTD bus home, and a bus over to Centennial to swim. If we are still going to have off site facilities, we need enough parking so that these students can get to their activities and spend enough time on homework.

Finally, are any of the buildings that Unit 4 has an option to purchase have landmark status? What is the feeling of the neighborhood regarding the demolition of these buildings?

Thank you.
