

April 14, 2016

Thanks to all the committee members and administrative staff who are taking the time to wade through these important issues.

The Tier II Committee has heard about many of the issues at several schools in our district, including Health/Life/Safety (HLS) items. Several community members have either made a statement or asked a question about a long term plan to deal with all these issues, and so far the official response has been that the Tier II Committee is charged with addressing such long term planning as a recommendation to the Board of Education.

How can we in the community help with that process? Assuming such a long term plan will be presented by the Tier II Committee on or before the last meeting of June 13th, are their plans for a "open format" type of community workshop, or even a charrette?

Respectfully,  
Charles Schultz
